

Supplemental Material S8. Robust regression results of the nested regression for the RS group predicting acute language scores from acute lesion volume + chronic lesion volume + chronic lesion classification.

Intercept	Value	Standard Error	<i>t</i>-value
Acute Lesion Volume	−0.001	0.002	−5.870
Chronic Lesion Volume	0.000	0.007	0.039
Chronic Infarct Other	0.139	0.141	0.986
Chronic Infarct RH	0.187	0.194	0.960

Note. Residual Standard Error = 0.338; $df = 38$.
