

Supplemental Material S7. Robust regression results of the nested regression for the RS group predicting acute language scores from acute + chronic lesion volumes.

Intercept	Value	Standard Error	<i>t</i>-value
Acute Lesion Volume	−0.001	0.002	−5.881
Chronic Lesion Volume	−0.002	0.007	−0.295

Note. Residual Standard Error = 0.371; $df = 40$.
