

Supplemental Table 4. Mixed-model factorial analysis of variance (ANOVA) on absolute pupil diameter according to word difficulty and group.

Measure	Source	<i>df</i>	<i>MS</i>	<i>F</i>	<i>p</i>	η^2
Mean TERP	Group	1, 77	0.157	0.529	.47	.007
	Difficulty	1, 77	0.054	56.890	.000**	.425
	Difficulty \times Group	1, 77	0.000	0.043	.837	.001

Note. TERP = task-evoked response of the pupil.

** $p < .01$, one-tailed ($\alpha = .025$ with Bonferroni correction).
