# Supplemental Material S6

*Overall verbal stop-signal task data*

|      | Go-trial accuracy | Go-trial response time (ms) | Probability of stopping on a stop-trial | Stop-signal delay (ms) | Stop-signal reaction time (ms) | RT of responses on failed stop-trials (ms) |
|------|------|------|------|------|------|------|
| AWS  | 98.98 | 662.80 | .548 | 362.65 | 299.06 | 614.00 |
| AWNS | 99.44 | 646.88 | .547 | 347.67 | 302.64 | 594.41 |

*Note.* Data are averaged from the three stop-signal tasks, giving overall verbal outcomes. All data reported are averages taken from included participants. Go-trial accuracy represents percentage of accurate responses.
