Supplemental Material S4

Description of dependent variables

Variable	Description
SSRT	Inhibition latency
SSD	Stop-signal delay before presentation of stop-signal (i.e., longer for more accurate stopping; shorter for less accurate stopping)
Go-response time	Average response time on a go-trial
Failed stop-response time	Average response time on a stop-trial (i.e., failed stop)
Probability of accurately stopping	Probability of accurately stopping during a stop-trial
Accuracy	Go-response accuracy (i.e., correct button-press; correct letter/image naming)
