

# VALI Caregiver SURVEY

---

## Start of Block: Intro

Q1.1

**Para completar la encuesta en español, seleccione "Español (America Latina)" en el botón de arriba.**

**Thank you for participating in this study for the VALI Lab at the University of Minnesota.**

VALI is an online, app-based language intervention for Spanish-speaking Latino families and children who are receiving Early Intervention services for communication delays. VALI helps caregivers\* support their child's talking by using Spanish (or English) in everyday activities.

Caregivers who use VALI will learn how to help their child talk. They will (1) receive resources via text messages and a phone application. They will also (2) have access to a coach by uploading short videos on an app for feedback.

We would like to hear your honest opinions on the intervention materials and process. The information that you provide will help us improve Early Intervention services for children and families.

**The following survey will take about 30 minutes, and you will earn \$20 for completing the full survey.**

If you have any questions about the survey, please email us at [vali@umn.edu](mailto:vali@umn.edu)

We really appreciate your input.

\*Caregiver: the person(s) directly involved in daily interactions with the child (usually a parent, grandparent, aunt or uncle, neighbor, or cousin)
