

**Supplemental Material S6.** Significant SLP influences and propensity to recommend TL.

*This table highlights significant ( $p < .001$ ) interaction of SLPs propensity to recommend TL and the influences on decisions to use TL.*

<b>Those who most often recommend TL are more likely to be influenced than those who sometimes and/or frequently/always recommend by the following:</b>	<b>Mean Seldom/never recommend</b>	<b>Mean Sometimes recommend</b>	<b>Mean Frequently/always recommend</b>
Presence of penetration	1.6	2.0	2.3
Cough post-swallow	2.0	2.3	2.7
Cough pre-swallow	2.4	2.6	2.9
Performance on swallow trials with thin liquids	2.6	2.9	3.0
Ease of use	2.1	1.7	2.2
TL as a commonly employed practice	1.2	1.7	2.3
Staff familiarity with TL	1.6	2.0	2.3
Lack of alternative options	1.7	2.3	2.6
SLPs own positive experience with TL	1.5	2.1	2.5
Recommendations of experienced colleagues	1.5	2.0	2.4
<b>Those who most often recommend TL are less likely to be influenced by the following:</b>			
Lack of supporting evidence for TL	<b>2.8</b>	<b>2.6</b>	<b>2.1</b>
