

**Supplemental Material S1.** Pearson correlations between the continuous predictor variables: age (in months), performance on the digit span backwards task (DSBW) and the crosslinguistic nonword repetition test (CL-NWRT), and the children's degree of Swedish exposure.

		Age	DSBW	CL-NWRT	Swedish exposure
Age	Pearson's <i>r</i>	—			
	<i>p</i> -value	—			
DSBW	Pearson's <i>r</i>	.094	—		
	<i>p</i> -value	.389	—		
CL-NWRT	Pearson's <i>r</i>	.008	.194	—	
	<i>p</i> -value	.943	.073	—	
Swedish exposure	Pearson's <i>r</i>	.030	.026	.197	—
	<i>p</i> -value	.780	.812	.069	—

Note. \* $p < .05$ . \*\* $p < .01$ . \*\*\* $p < .001$ .
