

Supplemental Material S6. The number of effect sizes, participants, and studies and quality ratings of studies contributing to six treatment outcome measures.

Variable	Trained language				Untrained language			
	TE	WLG-Related	WLG-Unrelated		CLG-Tx	CLG-Related	CLG-Unrelated	
	Cohen's <i>d</i>	Cohen's <i>d</i>	Cohen's <i>d</i>	%MPC	Cohen's <i>d</i>	Cohen's <i>d</i>	Cohen's <i>d</i>	%MPC
N of Effect Sizes	43	23	47	32	39	23	41	30
N of Participants	25	17	27	17	21	17	22	10
N of Studies	7	5	10	10	6	5	8	7
Study Quality	5 Good	3 Good	7 Good	8 Good	4 Good	3 Good	6 Good	6 Good
Ratings	2 Fair	2 Fair	3 Fair	2 Fair	2 Fair	2 Fair	2 Fair	1 Fair

Note. CLG-Tx = Cross-language generalization of trained words. CLG-Related = Cross-language generalization of untrained related words. CLG-Unrelated = Cross-language generalization of untrained unrelated words. N = Number. TE = Treatment effect. WLG-Related = Within-language generalization of untrained related words. WLG-Unrelated = Within-language generalization of untrained unrelated words. %MPC = Percent of maximum possible change.
