

Supplemental Material S9. Procedural reliability checklist for generalization phase: answering questions behavior.

Code Name:
Peer/Experimenter (Circle/Highlight one)
Coder's Name:
Date:

Directions: Place a check in the box if the step was completed. Place an X in the box if the step was not completed.

Prior to Beginning of Session

- ☐ iPad opened to home page on Proloquo2Go
- ☐ Peer participated

Probe #1 (How are you?)

- ☐ Peer starts session by using aided modeling to state, "Hi, how are you?"
- ☐ Peer waits 5 s without giving cues
- ☐ Peer selects participant's preferred game/activity

Probe #2 (Do you like this game?)

- ☐ Peer uses aided modeling to ask, "Do you like this game?"
- ☐ Peer waits 5 s without giving cues

Did the participant answer yes or no respond? Go directly to probe labeled probe #3 or 4 ☐

Did the participant answer no? See steps below labeled option for probe 3. ☐

Option for Probe #3

- ☐ Peer selects another preferred activity.
- ☐ Peer uses aided modeling to ask, "Do you like this game?"
- ☐ Peer waits 5 s without giving cues

Probe #3 or 4

Highlight question asked

- ☐ Peer uses aided modeling to ask, "Are you having fun?" or "Is it my turn?"
- ☐ Peer waits 5 s without giving cues

Probe #4 or 5

Highlight question asked

- ☐ Peer uses aided modeling to ask, "Are you having fun?" or "Is it my turn?"
- ☐ Peer waits 5 s without giving cues

Probe #5 (if needed)

Highlight question asked

- ☐ Peer uses aided modeling to ask, "Are you having fun?" or "Is it my turn?"
- ☐ Peer waits 5 s without giving cues

End of Session

- ☐ Session lasted 20-30 minutes
- ☐ No cues were given for the duration of the sessions
- ☐ Five probes were given targeting answering questions
