

Supplemental Material S4. Interobserver agreement (IOA) percentages (occurrence) by participant and variable.

	Hector			Mateo			Total
	<i>M</i>	Min	Max	<i>M</i>	Min	Max	<i>M</i>
Peer A interactions	81.1%	33.0%	100.0%	82.0%	33.0%	100.0%	80.2%
Peer B interactions	79.9%	50.0%	100.0%	89.4%	80.0%	100.0%	84.5%
Focus student interactions	80.8%	0.0%	100.0%	79.9%	0.0%	100.0%	80.4%
Peer interaction type	91.0%	67.0%	100.0%	90.3%	79.0%	100.0%	91.0%
Peer mode	97.2%	84.0%	100.0%	99.4%	92.0%	100.0%	98.2%
Focus student mode	90.1%	50.0%	100.0%	84.7%	50.0%	100.0%	88.0%
Focus response/initiation	83.6%	0.0%	100.0%	90.6%	50.0%	100.0%	88.0%

Note. The reported min and max are the lowest and highest IOA percentage across all individual sessions. Low session IOA occurred when the behavior of interest occurred infrequently (e.g., if only one occurrence of the behavior occurred, session IOA could only be 0% or 100% and would be 0% if one coder coded the behavior and the other coder did not).
