

Supplemental Material S5. Pearson correlations for total summarization quality scores for compare–contrast, cause–effect, and narrative lectures, age, socioeconomic (SES) factors, cognitive composite score, and expressive syntax score ($N = 48$).

Discourse	Summarization quality total	Age at testing	SES factor 1	SES factor 2	Cognitive composite score	Expressive syntax score
Compare–contrast						
Summarization quality total	1.0					
Age at testing	.26*	1.00				
SES factor 1	.38**	.02	1.00			
SES factor 2	.03	–.04	.32**	1.00		
Cognitive composite score	.30*	.30*	.02	–.03	1.00	
Expressive syntax score	.10	–.04	.35**	.28*	–.10	1.00
Cause–effect						
Summarization quality total	1.00					
Age at testing	.25*	1.00				
SES factor 1	.38**	.02	1.00			
SES factor 2	.12	–.04	.32**	1.00		
Cognitive composite score	.37**	.30*	.02	–.03	1.00	
Expressive syntax score	.26*	–.04	.35**	.28*	–.10	1.00
Narrative						
Summarization quality total	1.00					
Age at testing	.24*	1.00				
SES factor 1	.37**	.02	1.00			
SES factor 2	.25*	–.04	.32*	1.00		
Cognitive composite score	–.06	.30*	.02	–.03	1.00	
Expressive syntax score	.47***	–.04	.35**	.28*	–.10	1.00

* $p < .05$. ** $p < .01$. *** $p < .001$.
