

Supplemental Material S23. Results of linear regression model of neutral tone pitch slopes with different parameters (Context: after T1/2/4 and after T3; Type: Reduplicative and Possessive). The predictors were entered into the model stepwise and the best model included all predictors.

Predictor	ΔR^2	<i>B</i>	<i>SE (B)</i>	β	<i>p</i>
Context	0.16	0.188	0.025	0.120	< .001***
Type	0.04	−0.287	0.022	−0.209	< .001***
Age at implantation	0.05	0.006	0.002	0.069	< .001***
CI experience	0.01	−0.002	0.002	−0.002	.908
Chronological age	0.01	0.006	0.001	0.010	.641
Residual hearing	0.01	0.003	0.003	0.025	.149
