

Supplemental Material S24. Results of linear regression model of neutral tone duration with different parameters (Context: after T1/2/4 and after T3; Type: Reduplicative and Possessive). The predictors were entered into the model stepwise and the best model included all predictors.

Predictor	ΔR^2	<i>B</i>	<i>SE (B)</i>	β	<i>p</i>
Context	0.01	0.140	0.101	0.073	.144
Type	0.10	−0.517	0.082	−0.306	< .001***
Age at implantation	0.09	−0.019	0.093	−0.228	< .05*
CI experience	0.02	0.011	0.090	0.138	< .05*
Chronological age	0.02	0.010	0.093	0.123	< .05*
Residual hearing	0.01	−0.014	0.011	−0.119	.831
